

Terraquaculture Training

4 day workshop

Introducing the culture, craft and science of farming water
flowing through the landscape.

9-13 April 2010

Taranaki

Dao terraquaculture, the world's most productive farming system, has thrived for over 5000 years in the Asia-Pacific realm - achieving levels of sustained productivity beyond the reach of agriculture.

This 4 day practical workshop will expand your skills and capabilities in productive farming and forestry systems to enable sustainable rural livelihoods in Aotearoa.

with **Haikai Tane**

Adjunct Professor, Sustainable Development,
Chinese Academy of Sciences:

Watershed systems, terraqueous habitats, Dao natural farming in the Asia Pacific, watershed restoration in Australia and NZ, traditional terraquaculture in China and India.

Practical and applied field trials~site visits~ presentations
Case studies of operating systems~learning-by-doing training

Key skills and capabilities developed include:

Building rural skills and team capabilities.

Reading landscape and mapping watershed habitats.

Enhancing watershed systems, role of ecostructures.

Sustainable development of rural properties.
